I enjoy a good breakfast
sandwich.

EXPERIENCE

Zonder Studios

CTO & LEAD ENGINEER

June 2017 - Present

- Led a small programming team to develop Zonder, a cross-platform app which uses [geolocation](#) to award users for visiting real-world locations.
- Implemented the development infrastructure for Zonder, including [Continuous Integration & Delivery](#), Git workflows, and various backend services.
- Designed and [built a web app in React](#) to allow other teammates to manage game content, users, and other dynamic features of Zonder.

FirstEnergy Corp

BI TOOLS INTERN

June 2017 - September 2017

- Built an HR talent management dashboard, which replaced a tedious manual process and made it easy for managers to view employee statistics.
- Effectively used data modeling, QlikView, and SQL to [implement complex aggregations and visualizations](#) for the dashboard.
- Worked closely with other employees to develop automated QlikView reports, which helped many teams stay up-to-date on important statistics.

GCC Repair Shop

SOFTWARE ENGINEER & HELPDESK ASSOCIATE

April 2016 - January 2018

- Designed and [programmed an intuitive Windows application](#) to automate detailed label printing for new Helpdesk tickets.
- Communicated with students and faculty about their computer problems, [solving a wide range of technical issues](#) as a Helpdesk Associate.
- Led a small team to quickly refurbish and test hundreds of laptops over the summer, ensuring reliable re-deployment to incoming students.

Stop Click Bait

OPEN SOURCE WEB DEVELOPER

April 2017 - June 2017

- Utilized HTML, CSS, JavaScript, and jQuery to assist with the frontend development of an open source browser extension for the StopClickBait organization.
- Quickly learned PHP with the Laravel framework to add several endpoints to the StopClickBait REST API.
